

Case Study: Connectoo

Completed

About the project:

Education

iOS, Android, Web

Israel

8 months

2 manual testers

Artem L

Sergey S

Client:

Connectoo: comprehensive end to end platform for teachers and parents that promotes powerful and valuable home school interaction in order to advance children's success.

Requirements:

The client wanted to find a QA agency who could create a QA process from a scratch on his project which consisted of IOS/Android apps and Admin panel.

Team:

Ori Mandelevich - co-founder of Connectoo. It is a startup in Israel - comprehensive end to end platform for teachers and parents that promote powerful and valuable home school interaction in order to advance children's success.

Development team was placed in Ukraine and in Israel (7 persons in a team)

What was done?

- Included QA process into development
- Created a MindMap of all features/relations which exist in service
- Created a test strategy/test documents/regression plan
- Managed all project to a 2 QAs
- Tested IOS/Android/Admin panel:
 - Functional testing
 - Regression testing
 - UI/UX testing
 - API testing
 - DateBase testing
 - Security testing
 - Performance testing

THE PROCESS OF CHOOSING A CANDIDATES:

- Our QAs were recommended to an Ori by another company
- We had a call where discussed a project and our methods of work
- We were selected as QA agency and 2 our manual engineers worked on this project

Results:

All tickets were handled in Basecamp + Excel

During project reported ~ 1230 tickets

Were made around 14 releases and all of them were done successfully

The main result which client wanted to succeed was done: Each release was without Major issues on production. User feedbacks were good 4.8/5

Client Feedback:

"Good job! Good communication with a team. Already recommended them to my partner."
